RE: Supplemental Special Local Need Registration for Ro-Neet 6-E, EPA Reg. No. 73637-5-74530, SLN #ID-010015B, Manufactured by Tri-Ag, Inc. and distributed by Helm Agro U.S.

Dear Sir:

Enclosed is a label for a supplemental Section 24(c) Special Local Need registration (SLN) for the use of Ro-Neet 6-E, EPA Reg. No. 73637-5-74530, SLN #ID-010015B, Manufactured by Tri-Ag, Inc. and distributed by Helm Agro U.S. Ro-Neet 6-E is one of several products that were transferred from Zeneca Company to Tri-Ag, Inc. on November 3, 2000. Tri-Ag received an SLN registration (ID-010015) for this use on July 18, 2001. Helm Agro was appointed as the Tri-Ag, Inc. agent for this product on July 10, 2003 (copy of letter enclosed) and has requested approval to distribute a supplemental SLN label for the identical use allowed in SLN #ID-010015. Even though the USEPA does not register supplemental labels, I am enclosing a copy of this supplemental SLN for your information and SLN files. This label is identical to the approved Tri-Ag label (copy enclosed), except for the EPA Reg. No. and company information. If you have any questions about this SLN, contact me at 208-332-8593.

Sincerely,

George Rube

George Robinson  
Pesticide Program Manager

## Enclosures

P.c.: Jeanine Betscher, Helm Agro  
Ronda Hirnyck, U of I

1. The first part of the document is a letter from the author to the editor, dated 1954. The letter discusses the author's work on the history of the Russian Revolution and the role of the Bolsheviks. The author mentions that he has been working on this project for several years and that he has received a lot of feedback from other historians. He also mentions that he has been invited to give a lecture on the subject at a conference in Moscow.

2. The second part of the document is a letter from the editor to the author, dated 1954. The editor thanks the author for his letter and for his work on the history of the Russian Revolution. The editor also mentions that he has received a lot of feedback from other historians and that he is planning to publish a book on the subject in the near future.

3. The third part of the document is a letter from the author to the editor, dated 1954. The author discusses the author's work on the history of the Russian Revolution and the role of the Bolsheviks. The author mentions that he has been working on this project for several years and that he has received a lot of feedback from other historians. He also mentions that he has been invited to give a lecture on the subject at a conference in Moscow.

4. The fourth part of the document is a letter from the editor to the author, dated 1954. The editor thanks the author for his letter and for his work on the history of the Russian Revolution. The editor also mentions that he has received a lot of feedback from other historians and that he is planning to publish a book on the subject in the near future.

5. The fifth part of the document is a letter from the author to the editor, dated 1954. The author discusses the author's work on the history of the Russian Revolution and the role of the Bolsheviks. The author mentions that he has been working on this project for several years and that he has received a lot of feedback from other historians. He also mentions that he has been invited to give a lecture on the subject at a conference in Moscow.

6. The sixth part of the document is a letter from the editor to the author, dated 1954. The editor thanks the author for his letter and for his work on the history of the Russian Revolution. The editor also mentions that he has received a lot of feedback from other historians and that he is planning to publish a book on the subject in the near future.

7. The seventh part of the document is a letter from the author to the editor, dated 1954. The author discusses the author's work on the history of the Russian Revolution and the role of the Bolsheviks. The author mentions that he has been working on this project for several years and that he has received a lot of feedback from other historians. He also mentions that he has been invited to give a lecture on the subject at a conference in Moscow.

8. The eighth part of the document is a letter from the editor to the author, dated 1954. The editor thanks the author for his letter and for his work on the history of the Russian Revolution. The editor also mentions that he has received a lot of feedback from other historians and that he is planning to publish a book on the subject in the near future.

9. The ninth part of the document is a letter from the author to the editor, dated 1954. The author discusses the author's work on the history of the Russian Revolution and the role of the Bolsheviks. The author mentions that he has been working on this project for several years and that he has received a lot of feedback from other historians. He also mentions that he has been invited to give a lecture on the subject at a conference in Moscow.

10. The tenth part of the document is a letter from the editor to the author, dated 1954. The editor thanks the author for his letter and for his work on the history of the Russian Revolution. The editor also mentions that he has received a lot of feedback from other historians and that he is planning to publish a book on the subject in the near future.

**HELM AGRO US, INC.**

**REGISTRATION FOR SPECIAL LOCAL NEED  
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF IDAHO**

**RO-NEET® 6-E**

EPA Reg. No. 73637-5-74530

EPA SLN No. ID-010015B

**FOR WEED CONTROL IN POSTEMERGENT SUGAR BEETS**

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**SUGAR BEETS:** Postemergence (After The First True Leaves Have Formed) Apply 1/2 - 2/3 gallon per acre of RO-NEET 6-E after thinning and clean cultivation and incorporate to a depth of 2 to 3 inches.

or

Surface apply 1/2 - 2/3 gallon per acre of RO-NEET 6-E and incorporate using 1/2 - 3/4 inch of sprinkler irrigation water, or enough water to penetrate the soil to a depth of 3 - 4".

or

Meter 1/2 - 2/3 gallon per acre of RO-NEET 6-E into the sprinkler irrigation system using a metering device that will introduce a constant flow. Meter into sufficient water to penetrate to a depth of 3-4 inches. Time the application to insure that proper soil penetration corresponds to the end of the irrigation set. Turn the water off promptly after flushing all lines. Use the lower rate on sandy soils and the higher rate on heavier soils.

**All incorporations must occur immediately after application.**

Do not tank-mix with Betamix. For a list of weeds controlled see EPA registered RO-NEET 6-E label.

Apply this product only through sprinklers, including center pivot, lateral move, end tow, side (wheel) roll, traveler, big gun, solid set, or hand moved. Do not apply this product through any other type of irrigation system.

Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from nonuniform distribution of treated water.

- If you have any questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.
- Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label-prescribed safety devices for public water systems are in place.
- A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

**SPRINKLER IRRIGATION USE REQUIREMENTS:**

- The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.
- The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

- The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.
- The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.
- The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.
- Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.
- Do not apply when wind speed favors drift beyond the area intended for treatment.

**All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.**

**This labeling must be in the possession of the user at the time of pesticide application.**

**IMPORTANT: Read the entire Directions for Use and the Conditions of Sale and Warranty before using this product.**

#### **CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY**

**NOTICE:** Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of Helm Agro US, Inc. or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold Helm Agro US, Inc. and Seller harmless for any claims relating to such factors.

Helm Agro US, Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or Helm Agro US, Inc., and Buyer and User assume the risk of any such use. HELM AGRO US, INC. MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

In no event shall Helm Agro US, Inc. or Seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product. THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF HELM AGRO US, INC. AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF HELM AGRO US, INC. OR SELLER, THE REPLACEMENT OF THE PRODUCT.

Helm Agro US, Inc. and Seller offer this product, and Buyer and User accept it, subject to the foregoing conditions of sale and limitations of warranty and of liability, which may not be modified except by written agreement signed by a duly authorized representative of Helm Agro US, Inc..

**Application for/Notification of State Registration  
of a Pesticide To Meet a Special Local Need**  
(Pursuant to section 24(c) of the Federal Insecticide,  
Fungicide, and Rodenticide Act, as Amended)

For State Use Only

Registration No. Assigned  
ID-010015

Date Registration Issued

July 18, 2001

**1. Name and Address of Applicant for Registration**

TRI AG, INC.  
5100 Poplar Avenue, Suite 2414  
Memphis, Tennessee 38137

**2. Product is (Check one)**

EPA-Registered

EPA Registration Number

73637-5

New (not EPA-registered)

Attach EPA Form 8570-4, Confidential Statement of  
Formula for new products.

EPA Company Number

73637

**3. Active Ingredient(s) in Product**

cycloate

**4. Product Name**

RO-NEET 6E

**5. If this is a food/feed use, a tolerance or other residue clearance is  
required. Cite appropriate regulations in 40 CFR Part 180, 185, and/or  
186.** 180.212

**6. Type of Registration (Give details in Item 13 or on a separate  
page, properly identified and attached to this form):**☐ a. To permit use of a new product.☒ b. To amend EPA registrations for one or more of the following purposes:☐ (1) To permit use on additional crops or animals.☐ (2) To permit use at additional sites.☐ (3) To permit use against additional pests.☒ (4) To permit use of additional application techniques or equipment.☐ (5) To permit use at different application rates.☐ (6) Other (specify below)**7. Nature of Special Local Need (check one)**☐ There is no pesticide product registered by EPA for such use.☒ There is no EPA-registered pesticide product which, under the conditions of use within  
the State, would be as safe and/or as efficacious for such use within the terms and  
conditions of EPA registration.☐ An appropriate EPA-registered pesticide product is not available.**8. If this registration is an amendment to an EPA-registered product, is it  
for a "new use" as defined in 40 CFR 152.3?**☒ Yes (discuss in Item 13 below)☐ No**9. Has an EPA Registration or Experimental Use Permit for this chemical ever been  
(check applicable box(es), if known):**☒ Sought☒ Issued☐ Denied☐ Cancelled☐ Suspended☒ Registration☐ Experimental Use Permit☐ No Previous Permit Action☒ Sought☒ Issued☐ Denied☐ Revoked

If any of the above are checked, list States in Item 13 below.

☐ No FIFRA section 24(c) Action**Certification**

I certify that the statements I have made on this form and all attachments  
thereto are true, accurate, and complete. I acknowledge that any  
knowingly false or misleading statement may be punishable by fine or  
imprisonment or both under applicable law.

**11. Endangered Species Act: (Give details in Item 13 or on a separate page,  
properly identified and attached to this form)**

Identify the counties where this pesticide will be used. If Statewide, indicate "all."  
Provide a list of Federally protected endangered/threatened species which occur in  
the areas of proposed use.

**12. Indicate use status of Special Local Need, i.e., planned dates of  
use:**

From: 03/01/01 To: 11/30/01

**13. Comments (attach additional sheet, if needed)**

This SLN was originally issued to Zeneca and transferred to TRI AG 12/00.  
No other product available for season long weed control, particularly  
nightshade. This use will give extended residual nightshade control and  
possibly cut down on number of applications of post emergent contact  
materials.

Similar applications approved in states of Oregon and Washington.

**Determination by State Agency**

This registration is for a Special Local Need and is being issued in accordance with section 24(c) of FIFRA, as amended. To the best of our  
knowledge, the information above is correct, except as noted in "Comments" below or in attachments.

**RO-NEET® 6-E**

EPA Reg. No. 73637-5

EPA SLN No. ID-010015

**FOR WEED CONTROL IN POSTEMERGENT SUGAR BEETS**

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**SUGAR BEETS:** Postemergence (After The First True Leaves Have Formed) Apply 1/2 - 2/3 gallon per acre of RO-NEET 6-E after thinning and clean cultivation and incorporate to a depth of 2 to 3 inches.

or

Surface apply 1/2 - 2/3 gallon per acre of RO-NEET 6-E and incorporate using 1/2 - 3/4 inch of sprinkler irrigation water, or enough water to penetrate the soil to a depth of 3 - 4".

or

Meter 1/2 - 2/3 gallon per acre of RO-NEET 6-E into the sprinkler irrigation system using a metering device that will introduce a constant flow. Meter into sufficient water to penetrate to a depth of 3-4 inches. Time the application to insure that proper soil penetration corresponds to the end of the irrigation set. Turn the water off promptly after flushing all lines. Use the lower rate on sandy soils and the higher rate on heavier soils.

**All incorporations must occur immediately after application.**

Do not tank-mix with Betamix. For a list of weeds controlled see EPA registered RO-NEET 6-E label.

Apply this product only through sprinklers, including center pivot, lateral move, end tow, side (wheel) roll, traveler, big gun, solid set, or hand moved. Do not apply this product through any other type of irrigation system.

- Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from nonuniform distribution of treated water.
- If you have any questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.
- Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label-prescribed safety devices for public water systems are in place.
- A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

**SPRINKLER IRRIGATION USE REQUIREMENTS:**

- The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.

The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

- The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.
- The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.
- The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.
- Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed favors drift beyond the area intended for treatment.

**All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.**

**This labeling must be in the possession of the user at the time of pesticide application.**

**IMPORTANT: Read the entire Directions for Use and the Conditions of Sale and Warranty before using this product.**

#### **CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY**

**NOTICE:** Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of TRI AG or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold TRI AG and Seller harmless for any claims relating to such factors.

TRI AG warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or TRI AG, and Buyer and User assume the risk of any such use. TRI AG MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

In no event shall TRI AG or Seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product. THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF TRI AG AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF TRI AG OR SELLER, THE REPLACEMENT OF THE PRODUCT.

TRI AG and Seller offer this product, and Buyer and User accept it, subject to the foregoing conditions of sale and limitations of warranty and of liability, which may not be modified except by written agreement signed by a duly authorized representative of TRI AG.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**SUGAR BEETS:** Postemergence (After The First True Leaves Have Formed) Apply  $\frac{1}{2}$  -  $\frac{2}{3}$  gallon per acre of RO-NEET 6-E after thinning and clean cultivation and incorporate to a depth of 2 to 3 inches.

or

Surface apply  $\frac{1}{2}$  -  $\frac{2}{3}$  gallon per acre of RO-NEET 6-E and incorporate using  $\frac{1}{2}$  -  $\frac{3}{4}$  inch of sprinkler irrigation water, or enough water to penetrate the soil to a depth of 3 - 4".

or

Meter  $\frac{1}{2}$  -  $\frac{2}{3}$  gallon per acre of RO-NEET 6-E into the sprinkler irrigation system using a metering device that will introduce a constant flow. Meter into sufficient water to penetrate to a depth of 3-4 inches. Time the application to insure that proper soil penetration corresponds to the end of the irrigation set. Turn the water off promptly after flushing all lines. Use the lower rate on sandy soils and the higher rate on heavier soils.

**All incorporations must occur immediately after application.**

Do not tank-mix with Betamix. For a list of weeds controlled see EPA registered RO-NEET 6-E label.

Apply this product only through sprinklers, including center pivot, lateral move, end tow, side (wheel) roll, traveler, big gun, solid set, or hand moved. Do not apply this product through any other type of irrigation system.

- Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from nonuniform distribution of treated water.
- If you have any questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.
- Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label-prescribed safety devices for public water systems are in place.
- A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

**SPRINKLER IRRIGATION USE REQUIREMENTS:**

- The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.
- The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

- The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.
- The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.
- The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.
- Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.
- Do not apply when wind speed favors drift beyond the area intended for treatment.

**All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.**

**This labeling must be in the possession of the user at the time of pesticide application.**

**IMPORTANT: Read the entire Directions for Use and the Conditions of Sale and Warranty before using this product.**

#### **CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY**

**NOTICE:** Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of Cedar or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold Cedar and Seller harmless for any claims relating to such factors.

Cedar warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or Cedar, and Buyer and User assume the risk of any such use. CEDAR MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

In no event shall Cedar or Seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product. THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF CEDAR AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF CEDAR OR SELLER, THE REPLACEMENT OF THE PRODUCT.

Cedar and Seller offer this product, and Buyer and User accept it, subject to the foregoing conditions of sale and limitations of warranty and of liability, which may not be modified except by written agreement signed by a duly authorized representative of Cedar.

### **CONDITIONS OF SALE AND LIMITED WARRANTY:**

The Directions For Use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, mixture with other chemicals not specifically recommended or other influencing factors in the use of the product, all of which are beyond the control of the Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold Seller harmless for any claims relating to such factors.

Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label, subject to the inherent risks referred to above, when used in accordance with directions under normal conditions of use. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller and Buyer and User assume the risk of any such use. SELLER DISCLAIMS ALL OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING ANY WARRANTY OF FITNESS OR MERCHANTABILITY.

When Buyer or User claims losses or damages resulting from the use or handling of this product (including claims based on contract, negligence, strict liability or other legal theories), Buyer or User must promptly notify in writing Seller of any claims to be eligible to receive either of the remedies set forth below. The EXCLUSIVE REMEDY OF BUYER OR USER and the LIMIT OF LIABILITY of Seller will be, at the election of Seller, refund of the purchase price paid for product bought, or replacement of amount of product used. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

RE: Special Local Need Registration (SLN) for Tri-Ag, Ro-Neet 6-E Herbicide (EPA Reg. No. 73637-5)  
for Postemergent Weed Control in Sugar Beets in Idaho, SLN #ID-010015.

Dear Sir:

Enclosed is a Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), Section 24(c) Special Local Need registration (SLN) to allow a postemergent application to control weeds in sugar beets in Idaho, SLN #ID-010015. This registration is a "Me Too" SLN, identical to Idaho SLN # ID-940002 (copy enclosed). Performance data was supplied by Zeneca with SLN #ID-940002. The federal label for Ro-Neet 6-E currently allows preplant and at planting applications at similar rates to sugar beets. This SLN will allow the product to be applied after true leaves are formed. All applicable directions on the federal label for Ro-Neet 6-E must be followed.

Based on the above information we believe the use of this product will result in an effective treatment without adverse environmental impacts. However, if you have any questions about this SLN, contact me at 208-332-8593.

Sincerely,

George Robinson  
Pesticide Program Manager

SUBJECT: Receipt of New 24 (c)

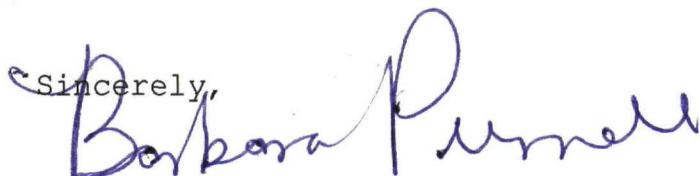

Dear State Agency:

The Office of Pesticide Programs acknowledges receipt of the 24(c) application/notification for ID010015. The package is being forwarded to the Product Manager for review.

To ensure that the Agency receives proper notification of your 24(c) applications/notifications it is necessary to use the correct mailing address. All new 24(c) applications should be sent to the following:

Document Processing Desk (SLN)  
Office of Pesticide Programs - H7504C  
U.S. Environmental Protection Agency  
Ariel Rios Building  
1200 Pennsylvania Avenue  
Washington, DC 20004

If you have any questions concerning the administrative screening of the package please contact the Front End Unit at (703) 305-5780.

Sincerely,  

Front End Processing Staff
